EXPERIENCE

Canoga Perkins, Chatsworth — Frontend Software Engineer

Apr 2022 – Present

- Developed a Network Management System (NMS) using React, Next.js, TypeScript, Redux Toolkit, and Kubernetes.
- Architected an event-driven structure to consume Kafka events using SSE, Redux Toolkit, and Redux-Saga.
- Built reusable UI components with PrimeReact.
- Created D3.js visualizations for real-time network topology updates.
- Improved REST API integrations and enhanced UI performance.
- Mentored engineers and promoted high code quality.
- Assisted with onboarding new engineers.
- Introduced TanStack Query (React Query) to modernize data-fetching workflows.

J.D. Power, Westlake Village — Frontend Software Engineer

Oct 2015 – Apr 2022

- Maintained a legacy AngularJS analytics application.
- Migrated the analytics platform to Angular 2+.
- Built REST APIs using Spring Boot and Hibernate/JPA.
- Created analytics dashboards with MicroStrategy.
- Integrated Firebase push notifications into a React Native application.
- Automated UI testing using Selenium and TestNG.
